OPERATION:

Flair Annunciators can be wired or wireless and made with or without graphic displays. Each door, window, room or panic switch has a green LED for status, a red LED for alarm and a yellow LED for bypass. Interaction with the annunciator is easy and intuitive with a single control button per zone for acknowledge, reset and bypass functions. Annunciators can have both local and remote adjustable sounders. Make it simple for your security personnel to respond quickly to alarms in your facility

Simple, Visual, Intuitive
