#### **OPERATION:**

Information at a Glance ......

Flair Wireless ENS48 Nurse Call Annunciator has a built-in Inovonics receiver and works with -60 and other transmitters. Registration of transmitters is easily performed using the LCD screen and push buttons on face plate or computer software. Each room has a red flashing LED for alarm. LEDs at top of annunciator provide status of power, transmitter batteries and transmitter communication. Adjustable alarm chime and silence button are located on top. ENS48 has serial interface for sending alarm messages to pagers and computer. Event log may be accessed on LCD or computer.
