DAV P/N= 0250-1010

DAV Features:

The WaveWare DAV is Designed to Perform the Function of Monitoring for Alert Messages and Displaying a List of Active Alerts onto a Compatible HDMI TV or PC Monitor.

The DAV is Capable of Working with the Following WaveWare Products:

1- The WaveWare **MARS** (Mobile Alerts Response System)

2- The WaveWare **SNAP** (Serial Network Alert Processor)
Of which is available as 2 Models: The Mini and the Standard

The DAV is a "Wired" Connection to the Above Products via the LAN Network

Audio Alerts can be Sent thru the HDMI Connection and so Heard via the TV Speakers or PC Speakers

Includes: Power Supply and Ethernet Cable and Mounting Bracket

Specifications:

- DAV utilizes the Raspberry Pi 3 with Linux OS

- HDMI Connection – Used to Connect the DAV to an HDMI Compatible TV or PC Monitor

- Ethernet Connection – Used to Connect the DAV to the WaveWare MARS or SNAP Products via the LAN Network

- DAV (Digital Alert Viewer) is also used as an HDMI Bridge for Viewing SNAP Alerts List Output Feature

- 5vDC AC to DC Universal Switching Power Supply

Note: WaveWare Also offers the **DAVp** (**D**igital **A**lert **V**iewer-**P**ager) Of which is a "Wireless" Device and Offers the Same Features, but works with a Paging Transmitter to Receive the Alerts to be Displayed and Listed onto HDMI Compatible TV and PC Monitors.
