Wireless Annunciators

Save the Sharks!

Operate at the level of Industry Leaders

Are you a smaller, temporary, or specialized facility or floor? Do you want to operate as efficiently and effectively as the bigger operations? We have your back!! With the easy-to-install and easy-to-operate wireless call system from Super Nurse Call (SNC), your facility can operate at the level of industry leading facilities. Model ENS24, twenty four devices, and ENS32, thirty-two devices, come with built-in Inovonics receivers and back-up batteries that will notify caregivers of a call with a gentle chime and an illuminated red LED next to the room or device number.

SAVE A SHARK, PROTECT THE OCEAN

Did you know, about 75,000 sharks are killed a year...

At Super Nurse Call, we like to get you thinking differently. You are more likely to die from a falling coconut than you are by a shark attack. Sharks play a crucial role in healthy ocean ecosystems because they are a top predator. They keep fish populations at a healthy level and prevent algae overgrowth that advances the decline of coral reefs. So many Sharks are killed each year for their fins. You don't have to go swimming with sharks, but you should advocate for their preservation. The health of our oceans and earth depends on them!
