

# THE SUPER JOURNAL

TRUSTED TECHNOLOGY FOR SUPER CAREGIVERS

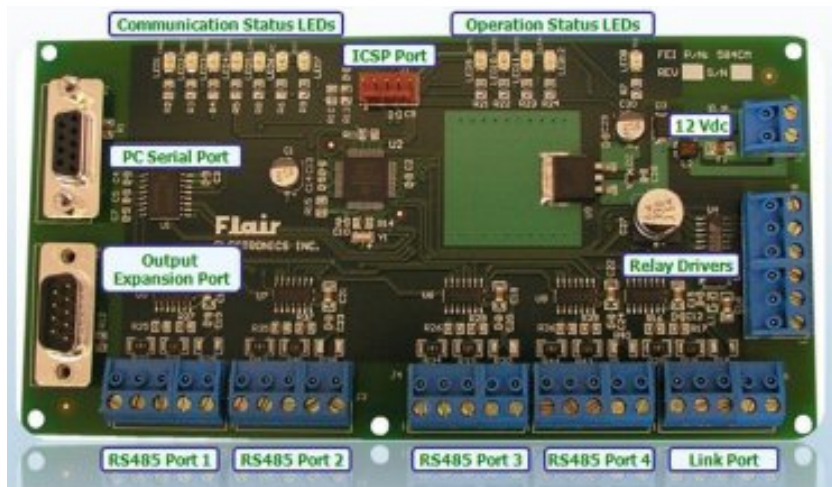

## THIS ISSUE FEATURES:

Communication Modules

Super Big Universe

### Increase Efficiency and Response Time

Super Nurse Call communication and receiver modules enable caregivers and administrators to be more efficient and respond quicker by providing more than one display per facility. The communication module connects the main wired annunciator to multiple remote annunciators with just an RS485 cable. With the same receiver module built into each wireless call system, it is easy to place multiple wireless displays around the facility. These modules also enable our annunciators to pass on calls to pagers and iPhones.

### Super Big Universe, Super Big Passions

We are part of a Super Big Universe. Our Sun is one of a few hundred billion stars in the Milky Way, which is one of a few hundred billion galaxies in the universe. These galaxies have been expanding out from a center since the Big Bang over 13.7 billion years ago. Everyone likes to look up on a clear dark night, see shooting stars and imagine what's going on out there. To look further into the universe, scientists have created hugely powerful telescopes like the Hubble. But you don't have to be a Ph.D. to take cool space photos. Many amateur astronomers like Gauthier Vasseur have built their own very powerful cameras and are having a great time discovering and filming spectacular sites like the Lagoon Nebula. Be Super too and find your passion.
