

THE SUPER JOURNAL

TRUSTED TECHNOLOGY FOR SUPER CAREGIVERS

THIS ISSUE FEATURES:

Turn-Key Systems

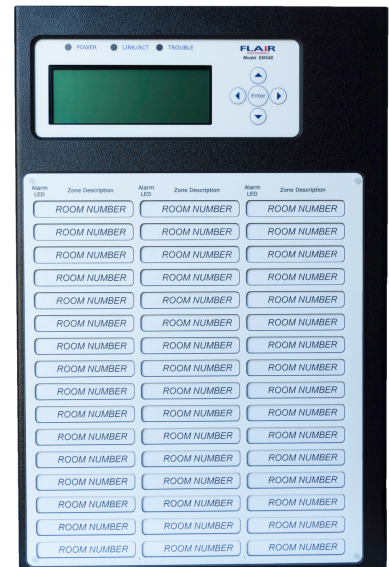

The Importance of Pet Insurance

Systems Built to Work for You

Super Nurse Call specializes in providing turn-key systems for all types of senior living facilities. What this means is that we can provide a system that includes all panels, devices and notification systems fully integrated, tested and programmed to work out of the box. Save some serious money and order an easy-to-install call system from Super Nurse Call. You'll be the superhero at your senior living home.

TRL Systems in Rancho Cucamonga, CA, has been in the life safety and health care markets for over 40 years. They do it all from design to installation to monitoring to service. According to Debbie Strunk, Account Executive at TRL, ***"We work with Super Nurse Call because they have wireless call systems that are quick to install, easy to use and cost effective."***

Debbie also explained that it is important that a nurse call system can notify caregivers at the main station and when they are on the run. **[Learn more about our solutions here.](#)**

Pets need Super Caregivers too

Although our newsletters are usually about humans, and the humans that take care of them, we decided to switch it up this month and tell you about the importance of getting pet insurance for your furry loved ones.

A study conducted by the People's Dispensary for Sick Animals predicts that the lifetime cost of owning a cat comes in at a whopping \$21,917 to \$30,942, with a dog costing you a staggering \$27,074 to \$42,545 over their lifetime. Pet insurance allows you to make the best possible decision on your pet's medical care without having to worry about the cost. Pet insurance is a great way to help you afford to keep your pet happy and healthy over his or her lifetime with quality veterinary care.
